

## REPLACEMENT PARTS ONLY

MOTION SENSOR

MODELS 500/525/550

To order, specify description and part number.

Description	Part Number
Receiver Module	62505-Mf
Transmitter Module	62506
Processor Module	62507
Relay Drive Module	62508
Modulated Island Module	62509-If
Service Module	62513
Service Module	62543
Check Module	62514
Extender Module	62616
Tuned Receiver Filter	62527-f
Motion Sensor Test Track Load (2,000 feet equivalent track)	62528-2000
Tuned Coupling Unit (used only for bypassing insulated joints) 156 Hz through 970 Hz	62785-f
Electronic Timer	62679
High Current Transmitter Coupler Assembly	62685-f
High Current Transmitter Coupler Module	62582-f

Frequency (f) must be the same as the frequency of the Motion Sensor transmitter/receiver.

## NOTICE

The replacement parts in this catalog section are offered subject to availability of component parts from our suppliers. In many cases, critical components are being discontinued as new technology is incorporated. While we continue to try to replace obsoleted components with suitable surrogates which are available, this is often not possible.

Consequently, we recommend that customers plan to replace older equipment covered in this catalog section with more modern equivalents where possible. Availability of critical components is beyond our control and we may find it impossible to supply some of these replacement parts in the future as our sources for components are exhausted.
